

Madhu Balu

React.js Frontend Developer

📞 9390532834 ✉ madhureddy.balu@gmail.com 🔗 linkedin 🌐 portfolio

SUMMARY

Frontend Engineer with **1.9 years of experience** developing scalable web applications using **React.js, JavaScript (ES6+), Redux Toolkit, HTML5, CSS3, REST APIs, Axios, Ant Design, and Material UI**. Experienced in reusable component architecture, API integration, state management, debugging, responsive UI development, Agile methodologies, and performance optimization. Passionate about building scalable, user-centric applications and expanding expertise in backend technologies.

PROFESSIONAL EXPERIENCE

Junior Software Engineer

03/2025 – 07/2026 | Hyderabad, India

People Tech Group 🌐

- Built a **URL-based Redux state hydration system**, ensuring consistent UI state across sessions and enabling shareable deep links for a **multi-role Advertising Marketplace platform**
- **Reduced redundant API calls by ~30%** by implementing conditional date-range and category-based selection logic, improving page performance and data accuracy
- Architected role-based dashboards for Buyer, Seller, and Admin modules, translating distinct end-to-end workflows — **product listing, campaign creation, approval flows** — into **cohesive UI experiences**
- Integrated **Google Maps JavaScript API** with React.js to provide location search, map visualization, Places Autocomplete, and location-based product discovery.
- Integrated an **AI-powered chatbot** into the React application, enabling conversational assistance through REST APIs, dynamic routing, session management, and Redux-based state handling to improve user engagement and navigation.
- Designed and implemented reusable React.js components using Ant Design, improving UI consistency, responsiveness, and accessibility across desktop and mobile devices.
- Shipped feature enhancements and **bug fixes in an Agile sprint** cycle, contributing to code reviews and maintaining high code quality across the codebase
- Developed a **multi-slot booking system** in React.js, enabling multiple date-range selections with availability validation, overlap prevention, quantity checks, dynamic pricing calculations, and backend API integration.
- Implemented a **reservation-based inventory locking system** using React.js, Redux Toolkit, REST APIs, and asynchronous API handling, including real-time countdown timers, reservation expiry, and concurrent booking prevention.

Internship

09/2024 – 02/2025 | Adoni, India

People Tech Group 🌐

- Built **responsive, component-based interfaces** using **HTML, CSS, JavaScript, and React.js**, ensuring consistent behaviour **across devices and browsers**
- Integrated REST APIs to power dynamic data rendering, handling **async responses** and UI feedback states for real-time usability
- Diagnosed and resolved **layout and interaction bugs**, improving **cross-browser stability** and reducing visual regressions

TECHNICAL SKILLS

- **Languages** : JavaScript (ES6+) , HTML5, CSS3
- **Frontend** : React.js, React Hooks, Functional Components, React Router, Material UI, Ant Design
- **State Management** : Redux, Redux Toolkit
- **API Integration** : REST APIs, Axios, JSON
- **Web Concepts** : Responsive Design, Cross-browser Compatibility, Reusable Components, Component-based Architecture, Performance Optimization, Lazy Loading, Code Splitting
- **Development Tools**: Git, GitHub , Postman

EDUCATION

B.Tech – Computer Science and Engineering

Bharath Institute of Higher Education and Research

CGPA: 9.18 | 2024
